

Douglas Fir Esbjerg Natural Oil

Our old-growth Douglas fir comes in very long and wide planks. In our favourite finish, we bleach and oil each board by hand, giving the wood its light and smooth Scandinavian touch. The wood can be soaped and reoiled again and again to feed and protect the surface patina for a long time to come. This finish works best in randomly blended very wide and very long boards for floors or walls.

|---------------------------------|---|
| Species | Douglas Fir |
| Finish* | Natural Oil |
| Origin | Douglas Fir (<i>Pseudotsuga menziesii</i>) mainly over 100 year old. Grown in responsibly managed central continental European forests. |
| Maintenance | This finish can be cleaned regularly using our Whitewash Oil Soap. This feeds and strengthens the surface over time and allows you to adjust the patina to your requirements. |
| Spot repair and Refinish | Professional maintenance with our Whitewash Maintenance Oil will make this finish richer and protect it over time. Spot repairs are possible with our touch-up kit. |

Structure**

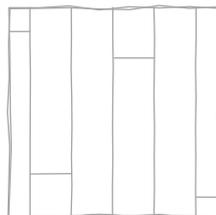

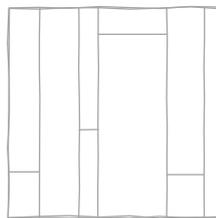

Engineered: 19.5 +/- 0.5 mm, top layer 4.5 +/- 0.5 mm

Solid: 19.5 +/- 0.5 mm

Recommended patterns

*) Whilst our sampling and photography endeavours to show grain and colour as natural as possible, a sample or photo are never an exact representation of an entire floor. Wood being a natural material, variation in colour and grain exists, floors may change appearance over time through exposure to light, wear and tear and maintenance.

**) Prefinishing of solid floors may be subject to more strict recommendations for limited board dimensions and climate control. Read further on the next page.
